

Kim Dinh

This is a quick introductory thing.

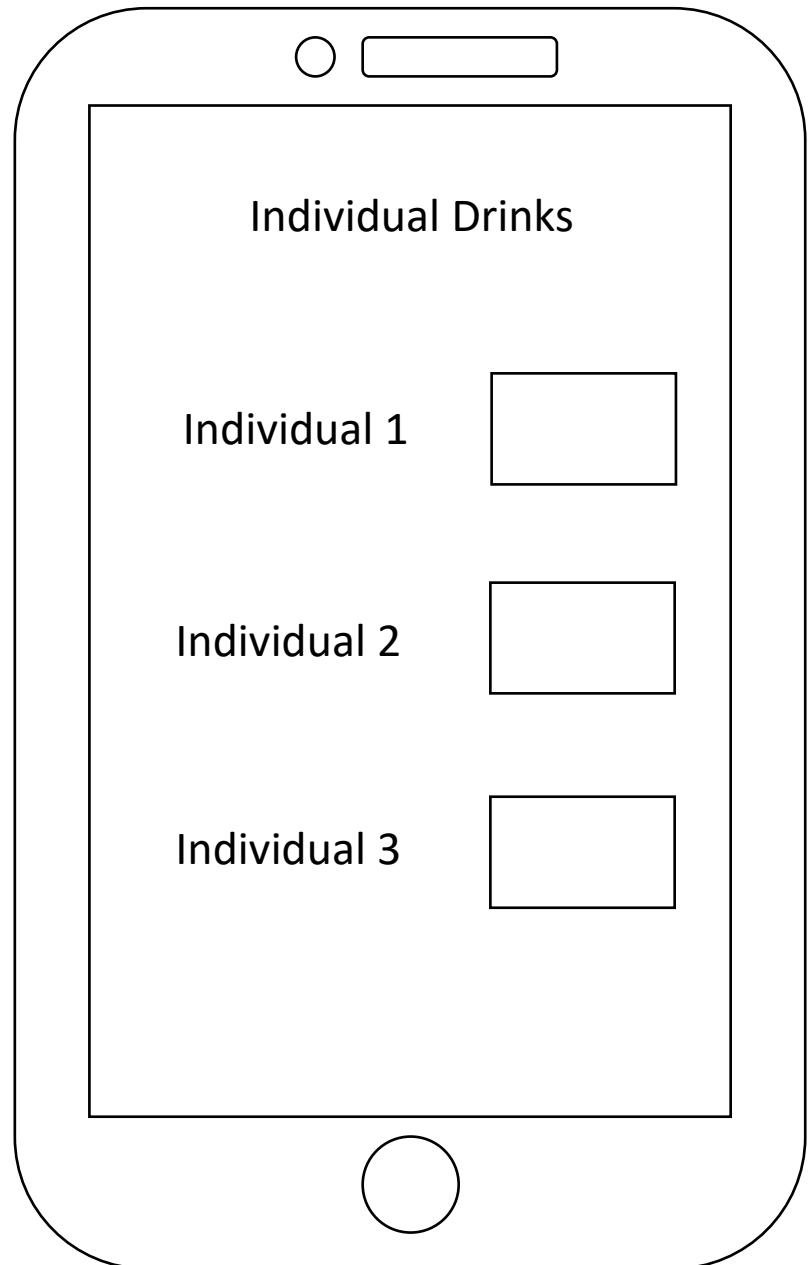

This allows the user to input number of drinkers and non-drinkers. Non-drinkers will automatically not be included when calculating splits for drinkers.

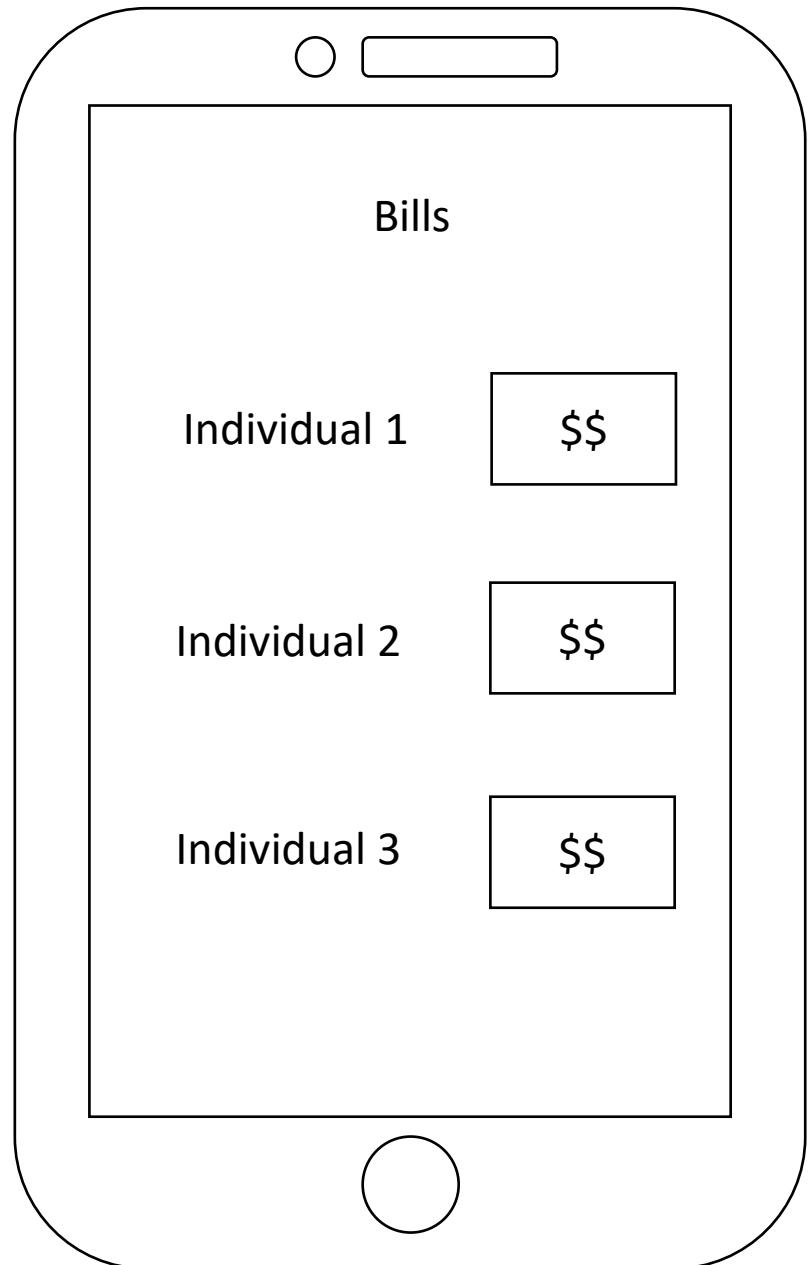

Non-drinkers automatically excluded from drinks.  
Individuals will pay for their own drinks. Group drinks will be split amongst drinkers.

Kim Dinh

Number of drinks for each individual drinker put here.

Kim Dinh

This is where the split bill will be.
