Website name: The Best Burgers

Topic description: I will make a website for an imaginary restaurant that sells burgers. I will include a rewards program for customers to earn deals on their orders. The restaurant will be a chain restaurant so there will be many different locations for the restaurant. There will also be a lot of opportunities for people looking for jobs to apply on the website. I will also keep reviews on the website.

Page names: Order, Check out, Contact Us, Apply for a job, Review, and locations

Data being stored and viewed: Prices for various items, different job opportunities available at the time, reviews made by customers, all of the various restaurant locations, users can sign up and login in so that they can use the rewards program
